

IN LHX ATTACK CHOPPER THE ENEMY SHOOT ON SIGHT

Take off for the hairiest flight of your life in LHX Attack Chopper. The first realistic helicopter simulation for the Mega Drive with true 3-D polygon graphics, from the people who brought you F-22 Interceptor. Armed with a multiple range of missiles, zoom straight to the very

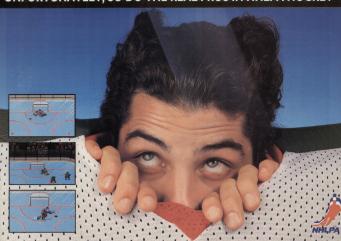

heart of the world's hottest battle zones aboard the experimental LHX, or the AH-64 Apache gunship. And get a bird's eye view of the action from the cockpit or any of seven external angles.

Take on 30 different classes of mission, including air to air and ground attack. Fly through a bewildering variety of weather conditions and take out 40 types of enemy targets.

Oh. And keep your head down.

UNFORTUNATELY, SO DO THE REAL PROS IN NHLPA HOCKEY

Same goes for NHLPA TM Hockey '93, the new-feature-packed sequel to the multi award-winning EA Hockey, featuring real pros. 'Cause those guys don't mess around.

With NHLPATM Hockey '93, you can give as good as you get. Hook, trip, and bodyflip your opponents. And get their teeth rattling with extra hard body checks, at the same time as maintaining "incredible balance" when you take a hit.

Pull out super slap shots and smash the backglass with the power of your shooting. You can even test your team management skills to get your team playing with the right blend of aggression and ability.

'93 also introduces a brand new species. The intelligent goalminder. He can dive, lunge, kick and skate out of his crease to clear loose pucks.

Performance statistics for every player are tracked automatically, and with the power of EEPROM backup, are constantly updated and saved to the cartridge together with playoff games in progress.

So what are you waiting for, get your skates on and fly down to your local store now!

EDITORIAL

Something wonderful is about to happen, and we're sharing the exciting details with you lot. Just what is it, and what are its consequences on the universe as a whole? Turn the page and let the man Jazza inform you.

NEWS

10 Hurrah! Everything you wanted to know about the zany world of consoles is brought before you in this fun-filled excursion to News Central.

MEAN YOB

This month, Rich had to put up with a phone call from an emotionally overworked adolescent demanding that YOB be removed from MEAN. MACHINES immediately! These four MASSIVE pages show how seriously we took his advice. 28

Q+A

Although he's completely bored with doing this section. Jazza still feels compelled to answer your probing questions about the consoles industry. Also! The "difficult" moves on Street Fighter II explained for those who have problems reading the manual.

TIPS

It's excitement overload in the section of the mag with the word "TIPS" in the corner. Massive guides to both Kid Chameleon and Asterix await. along with superb mini-tips guaranteed to have

you drooling in massive quantities over the page.

CHARTS

Once again we have the amazing accurate (and yet completely official) Nintendo charts for you. The funny thing is these charts look nearly, but not quite, completely unlike the charts compiled by Gallup! Fascinating eh? Also, we have the complete lowdown on the Master System and Megadrive as well, making this a chart experience to be savoured.

THE

HOTLINES 100 Examine this page for all your competition-related

requirements. Just select the prize you fancy winning, dial away, listen to the questions and send off your answers. Who knows? You might be the lucky winner! To the phone! Now!

PREVIEWS

Want to learn loads about the hottest new consoles games? Well, let your fingers do the walking to page 108, where a veritable treasure trove of top new games awaits your inspection.

NEXT MONTH

Well, considering what's happening next month is exposed in gratuitous detail on the Editorial, you can't expect much on this page can you? Well, we might yet surprise you, but don't get your hopes up.

SUPER NES JOYPAD DEBACLE

In last month's News section we reviewed some new topper Super NES joypads. However, what we neglected to mention is that these imported pads are not compatible with UK Super Nintendos. This is because Nintendo have rewired the joypad ports doh! However, a converter may be in the offing. For the latest information, give Advanced Console Entertainment a bell on 071 383 0480.

massive Atari coin-op, Gauntlet!

If you've just arrived on this world and have no idea what this game is about, listen up. You (and a pal in two player mode) adopt the persona of either a Wizard, Warrior, Elf or Valkyrie, It's your job to run around the eight-way scrolling mazes in search of the elusive exit. On the way, you blast many meanies and collect treasure

The conversion boasts just about all of the original coin-op's features, including every maze, each character and all the baddies. The only thing missing seems to be the four-player mode (there are only two joypad ports on the Megadrive, see).

If the game manages to capture all the thrills and spills of the original, it should be a right laugh. Look out for a full review in a future edition of MEAN. MACHINES SEGA

HAND-HELD

So, you like Sonic the Hedgehog eh? Well, a whole new Sonic game has just been released by Grandslam - on hand-held LCD format! The game features more high-speed antics from the world's favourite hedgehog as he battles the twisted Dr Robotnik and his various minions. Sonic the Hedgehog is out now, priced £19.99

There are many other Sega titles currently cropping up on LCD format, including (amongst others) Altered Beast. Look out for an LCD lowdown in a future issue of MEAN MACHINES.

Feast" your eyes on the first screenshots of Aliens Vs Predator, coming soon for your Super NES. From the screenshots it all looks rather jolly. Unfortunately, when Jazza saw it on his recent visit to the CES Show, he was startled and appalled by its crapness. Basically it's a Final Fight rip-off, with you controlling the Predator (who has learned rudimentary Karate, it would seem) as it runs around the playing area kicking the acidic excrement out of the Aliens. In that version, you could not play as an Alien and there was only a couple of attack moves! Hopefully, the game has been substantially overhauled since then. We wait with bated breath for the finished version...

F-117A TAKES OFF ON NES

Look out early next year for an 8-bit Nintendo conversion of one of Microprose's top PC simulations, F117A Stealth Fighter! From what we've seen of the

game, it packs in the majority of the PC features, including an extensive 3D map, loads of campaigns and generous lashings of doglighting action. The game is at a very early stage of development at the moment, but as you can see from the screenshots, the game is conting together prefty well.

Want to know more? Well, you'll just have to wait for the full preview and review that's coming up in future issues of NINTENDO MAGAZINE SYSTEM.

Work has been progressing at an astonating pace on King of the Monsters. If you didn't know, it's an eight-way scrolling destruction fest, with one or two-players adopting the manifes of massive monsters out to trash civilisation as we know it. These screenshots show the Super NES version. Sources who have seen this version were apparently taken aback by its shabbiness. However, we'll let you know.

The 16-bit console versions of Fatal Fury are also well into production. These Super NES screenshots look extremely close to the original Neo Geo game. the original but is still a pretty good laugh nonetheless. A third Neo Geo conversion has been announced since the summer CES Show. It's a translation of 2020 Baseball - a cyberpunk version of the American institution with massive robots replacing human blavers on the pitch. More news as and when we get it

EXCLUSIVE • EXCLUSIVE • EXCLUSIVE

SONIC 2

Work continues apace on Sega's hottest game of the year. Sonic the Hedgehog II, due out in November. The game is all but complete, with the project now entering the intensive play-testing phase.

As you can see from our Sonic Il screenshots (these are actually

from the REAL game, by the way, not just sadly doctored pictures from Sonic I), the platform-related gameplay of the original remains much the same. The aim is still to collect loads of rings and make your way to the exit. Once again, Doctor Robotnik is plotting a scheme of diabolical wretchedness and it's basically up to Sonic the Hedgehog to sort him out - this time for good.

Just like the original, Sonic II features some excellent roller-coaster style hazards as he traverses the speedy-scroll landscape. Sonic even attains speeds so fast he's seemingly glued to the platform he's running on, allowing him to travel upside-down! The game's storyboard also includes Sonic getting to grips with some vehicles. so expect to see the spiky hero hang-gliding across some of the lovolel

Perhaps the game's biggest addition is the inclusion of a new pal for Sonic the Hedgehog, He's a fox-like character called Two Tails (we're sure you can guess why). Apparently, a second player can take control of him and interact with Sonic, adding dimensions of gameplay that have the potential to make the game even better than Mario IV!

Well it all sounds rather spiffing doesn't it? Let's hope that the game's playtesters are going to improve on the lastability of the first game, which was, let's face it, way too easy. We'll keep you posted on the game's progress and hopefully get the review for our October or November issues of MEAN MACHINES SEGA.

MEGADRIVE

REVIEW

Ty to imagine the feeling someone might experience when they are punched a few dozen times in the stomach after a few dozen milkshakes and a few dozen burges. Not very ricce But for those who have fallen foul of Allen impregnation, feeling a bit beaton up and bloated would be a cosy allernative to the gut bursting hell that awaits them! Such is the detailing of immates on a futuristic run down prison planet. This is, of course, Allen 3, with Pipley as the

Megadrive owners are reased to plenty of gimblast firm up actions as the obligatory game of the film comes to the Megadrive. Although the film, Alen 3, decent actually behavine guins. 2010 Century Fox have allowed Acclaim to include at of the blasters from the film perdecessor. Fully tooled up. Ripely has to make her way around plenty of Allein inlessed levels to search out and rescute the prisoners. Ammo, energy and time can all be picked up on the journey, but the priority is finding all of the prisoners and getting through the exit before the mission time runs out. If it does, the unfortunates who have not been rescued are going to need more than Sellers Turns to ease the pain in their stomach!

VENTING AGGRESSIO

To reach some of the prisoners. Ripley is forced to crawl along ventilation ducts. Some of the more cuming Allens harbour around corners or up latides, beyond Ripley's view. Here is where the geneals prove most useful and constant glances at the motion detector are essential. Although extreme caution is advised in these confined spaces, remember that the clocks is toking.

HAVE A BLAST

Because there are so many Aliens desperate to set up home in Ripley's guts, she has been kitted out with an arsenal of topper firearms. Only by experimenting with the various weapons, are players able to work out what is the best one to use in particular situations:

HISE RIFLE

This is the good of common or garden machine gun. Because a takes quite a few hits to do away with the larger Aliens it eats up ammunition quickly, so always look out for spare magazines. To pulse rifle proves most valuable when tackling Face Huggers.

▲ "Oi! Come back 'ere you swine!"

AL

Accurate judgement is important when using grenades. They take a few seconds to detonate so aren't very good as a quick reaction weapon. Where they prove invaluable is in ventilation ducts and destroying closed doors.

Best saved for use against some of the larger Aliens, the rocket launcher is the most powerful weapon in the game. Only one shell is required to dispose of a single Alien! It's also useful when blowing away locked doors

More villanous scum saved by Ripley.

longer. It works especially well against Alien pods and their occupants.

Alien 3 immediately impresses with its dark, menacing graphical style, amazing parallax scrolling and excellent animation. The sound is equally superb, boasting some skill (if a tad inappropriate) music and raucous blasting effects. The gameplay is almost as impressive as the audio/visuals. The game is quite difficult (especially on the NORMAL and HARD levels), with a

crushing time limit and rock 'ard Allens constantly getting in your way. The only problem I can see with Alien 3 is the fact that the gameplay fails to change significantly between each level. It's always a case of learning where each and every Alien and prisoner is. The game runs to a set pattern which MUST be learnt to beat the time limit. If there was more to the game, Alien 3 would definitely deserve a Megagame award. As it is, although not perfect, Alien 3 is an extremely polished, highly enjoyable blasting/exploration game. I strongly recommend you take a look at it as soon as possible.

MEGADRIVE REVIEW

MOTION COMMOTION

If you've seen Aliens you'll be familiar with this device. Quite obviously, a motion tracker tracks motion! It locates both Aliens and prisoners. Aliens flash in blue (lo-erl), where as prisoners are located by a red light. This warning gives Ripley the chance to select the appropriate weapon and get herself good and ready.

SALT IN THE WOUND

If time runs out before Righly has completed the mission, it's currients for the prisoners left to the merce sets of the mission, it's currients for the prisoners left to the merce Righly has to by again, Justio for us dath in the wound though, the programmers have included a sequence showing the prisoners Righly falled to rescue.

COMMENT

The preview of this looked Impressive enough, but since then the programmers have polished it up and it now looks and plays even better. The screen shots make it obvious how good the graphics are. I haven't seen the film yet, but the game captures a real sense of deepals and forebodies with.

the game captures a real sense of despair and foreboding with brilliantly detailed backdrops and sprites. The animation is a winner as well contributing, as the

graphics do, to the cinematic atmosphere. The movement of Ripley's sprite is particularly realistic. It is at this stage that so many games are flawed, because more time has been spent on the way it looks than the way it plays. Fortunately, the gameplay in Alien 3 lives up to the standard of the graphics. Although changing to the best weapon takes a bit of getting used to, it soon becomes second nature finding the right blaster for the right moment. The inclusion of a time limit fuels the game with the frantic excitement of the films, and neat touches. like the chance to fire in man directions, and crawling along ventilation shafts, succeed in conveying the thrills and suspense you would expect. To top it all off there are some superb aural effects, especially the sound of the guns, which are expertly reproduced. My only criticism, concerned more with a matter of taste, is that the music didn't always seem to fit the atmosphere, lacking the grimmer elements of visual spectacle. Maybe a few Cure tracks would have gone down well here! This aside, Alien 3 has captured all of the elements a game needs to make it a classic

A NEW LOOK

Dear YOB I think it's time that MEAN MACHINES had a new look. C+VG have changed their look each year. I'm not saving that your style is getting old, but it's time for a change!

You could alter the ratings by making them more accurate, for example having graphs showing the lastability rating. This would be more informative and better for the reader than just a percentage.

If there are not enough tips sent in then you could have a players guide to the most popular game in the office that month. This guide could be written by the MEAN MACHINES team if any spare time was available.

designed. A game could be rated from 1 to 10 depending on how good they were in their game type 10 for a good example and 1 for the worst. I hope you listen to my views. Keep up the good work lads. Andrew Chang, Wimbledon, London

YOB: The final point sounds a bit too confusing even for my vast intellect. But if it's changes you want, wait until you get a load of next month's issue!

MONEY. MONEY. MONEY

Dear YOR I'm getting sick and tired of hearing a load of crap and believing it. I went down to my local dealers and

game is really worth? Sumon Chy and Co, Thatcham, Berks YOB: Realistically, £60.00 is

about top whack for the game. It is a superb product - one of the best games there is - but there is a limit as to how much a video game is really worth, and I think that £110 is way over the

Now let's say that one day a parent of Ray's just happens to pick up a copy of MEAN MACHINES and does not like what they see. Why!!? I hear you cry. Well the fact is that although MEAN MACHINES is full of readability, for people like Ray's parents it may be a little too colourful. I'm talking about the use of "indecent" pictures in your mag. Ray's parents would only have to see the advert for Lawnmower Man to get a little hot under the

Talk about turning back the image of the industry about ten years! Whoever was responsible should be buried up to his neck in manure.

SPIN THAT

I am an angry Game Gear owner. I read on Channel 4's teletext computer page that an adaptor is being developed by the Manchester company Ultra that

allows Atari Lynx owners to play Game Gear games. Please tell if this true as, surely. Sega are being ripped off? Glenn Graham, Carrickfergus, Co.

Dear YOB How on earth do you expect to get away with it? Charging £2.20 for MEAN MACHINES (a price increase of 25.7%). And I thought that the Chancellor had inflation licked. It isn't as if the mag has got bigger either. Also, the material of late has been getting a bit thin, giving way to more adverts. May I suggest that you keep your free gifts and put the price back to £1.75 in line with your competitors I am sure that many readers feel this way. So what do you say MEAN MACHINES? Unless something is done now I am sure that your sales will suffer in the long run. There are too many good competitors around for total customer lovalty. Just a bit of advice from an unbiased reader. Mr Unbiased Reader

YOB: Well, take that advice and stuff it up your rectum, you skinflint.

PILLOCK ON THE HILLOCK

Dear YOR

I would like the Game Gear but have no chance of winning it because I have no life and therefore no stories to tell. My idea of a good time is sitting in front of my portable, black and white TV watching Wheel of Fortune whilst consuming the contents of a rhino's bowel. My apparently worthless existence does boast

the Neighbours wedding collection video compilation. I haven't got a console, so the only reason I buy your mag is so I can wish I was as much of a bloke as Gary Harrod. Please make my buying MEAN MACHINES worthwhile - include double page spreads of the man Harrod, interviews, fashion tips and such. He's my idol. As I won't win the Game Gear, please send me an 8 page pin-up of Gary himself. Whilst we are on the subject, please, please give me a life, if not the Game Gear. If not, I'll settle for some senopods. I haven't

solidly excreted for several months now and it's getting guite painful. M Milky, Brentwood, Essex YOB: What a shining wit you are. Or should that be whining s... (snip! Jaz).

Dear YOB I recently borrowed a copy of

MEAN MACHINES from a friend, I flicked through it and, as a PC lover, my eye quickly rested on a letter from another one of my kind. Unfortunately, I didn't agree with

The whole point about IBM compatible machines is that they are more powerful, faster, larger and, of course, built for power, They run software and games that are exponentially larger and better than Megadrive games. There is, however, a price to pay. I have worked out that to buy a PC with approximately the same spec as a SNES as we know costs £150.

Many magazines, and indeed people, consider IBMs to be no machines which they can also use to do a bit of word processing on. This is offensive. PC's were made to write letters, create

games were a secondary use If PC manufacturers want to launch the IBM as a games machine the price needs to fall drastically. Until then, I'll stick to my PC for homework and huge roleplays and my Megadrive for a good shoot 'em up once in a while

about PCs and consoles is literature, MEAN MACHINES and MEGATECH all fall into the "tabloid" or "popular press" area of computer journalism. Whereas PC Plus, PC User and PC direct are all rather more bulky, often cheaper and don't litter their articles with words like "awesome" and "hot". Why is this? Again, it is because the kind of people who spend £2.00 on MEAN MACHINES are not the kind of people who own an Escort XR2i, work in the city and go to a yoga class on a Wednesday evening. It all boils down to this: Adults are interested to computers (and buy PC User) and kids are interested in consoles (and buy MEAN

I read PC Plus, PC Format and MEAN MACHINES. Out of these three I think the best is PC PLUS simply because it is larger, more interesting, more frequently grammatically correct and talks about the things that people who own a PC should be interested in. Gregory Marsh, London YOB: Now try telling me that PC owners aren't the most boring prats in the world.

CAPTAIN CLUELESS

Dear YOB

I am writing concerning your five page review of Street Fighter II in sissue 22. I think the review is great, giving all the attention to the SNES, but what about all us Megadrive owners? There have been several games that are equally as good, John Maddens '92 for instance, this never got a five page review. I also think that you were generous in giving it 99%.

Even though 1 enjoy playing the game 1 could send in a list of alterations to the game to make it, more of a competition. If your overall percentage is correct 1 can't wait to see your reviews in two years time when the games improve - 130% maybe? Criss S Harper, Liverpool YOB: Yawni Review percentages are all relative. Ten years ago a YCS game that got 90% wouldn't get that mark now.

would it? As games age, their value drops - a 90% game reviewed two years ago would be unlikely to score that nowadays. We judge games in the here and now. How else could we review games you stupid git?

2. When will the Jap Famicom CD system be available on import? 3. Will Sega's Menacer light gun be compatible with Mega CD games?

4. I was a little confused after reading your CES special report. Would I be correct in saving that there will be another Batman game on the Megadrive by Sunsoft, and that Batman Returns will also appear an the MD by Sega, and that Batman: Joker's Revenge will be by Sunsoft and Sega!?

Dear Jaz

I've just bought a copy of Street Fighter 2 for my SNES and there was a leaflet in the box, on the leaflet was an ad for a game called Breath Of Fire. Have you seen this game and, if so, is it any good? It also showed a picture of the Capcom Power Stick Fighter, when will this be available? Mark Watson, Bracebridge, Lincoln JAZ: The game isn't out vet, but as soon as it is, we'll be reviewing it.

BLAAAAAAAAA

Dear Jaz

I've got some guestions for you. 1. In last month's CES special you said the Terminator was coming out for the SNES. Is it like the Sega or PC version or is it an original game?

2. Will Total Carnage ever come out on the SNES? 3. Is Toxic Crusaders any good on the SNES? Is it a beat 'em up or a platform game?

4. Will there ever be a Red Dwarf (the TV series) game? Jerry "Jeremy" James. The big old World

JAZ: 1. It's currently under review - it could well be an original game by the time its finished. 2. Yes - next year. 3. Programming has only just started - there's nothing to see vet. 4. No.

Dear Jazzv R I would be pleased if you answer

up in Splatterhouse II, why does it look like Rick is taking a leak?

2. How can Sega justify the price of £45 per CD game? I know they reckon it's because of all the the price of music CD's. Music

recording studios and equipment etc. vet their finished items cost less than half the price of CD games

3. What's the point of bringing out a game on CD anyway? I mean, they play the same as cartridges except for a few snazzy intros which don't alter the gameplay whatsoever. Rob Robinson, Rotherham, South

JAZ: 1. 'Cos he is, 2. There's

Dearest Jaz

Please could you answer my questions so that I can make my mind up about whether I buy a SNES or not. 1. There is a rumour that there

will be a Super Final Fight where you can play all the characters and has all the levels of the arcade. Is this true and when is it coming out? 2. I am told that the SCART

SNES is faster than PAL ones. Is this true? Is there any way I can convert a UK PAL SNES into a SCART one, If so how? David Dinneen, Sunningdale, Berkshire

JAZ: 1. No. 2. Yes and no.

EEAAA00000G

Dear Jaz Could you please provide me with

the answers to the following humble questions? 1. Is anyone planning to convert

Bubble Bobble and Parasol Stars to the Megadrive to complete the trilogy? 2. Why are all Megadrive

RPG's set in medieval times? Why can't we have games like Monkey Island or Leisure Suit Larry?

3. Remember that 3-in-1 coin-op Three Wonders? Will it be converted and, if so to, which machine?

4. Is there any more news on the Battletech centre I read about

in C+VG?

5. You're joking about John Madden '93 aren't vou? 6. What is your dream car?

D Ankrah, North London JAZ: 1. No. 2. They're coming out on the Mega-CD. 3. I don't think so, but if it ever was it would appear on the Super NES. 4. No, which is a shame because it's totally mega, 5. No. 6. Ooooo. Probably either a Ferrari GTO or maybe a race-prepared Ford GT40 (classic 60's very highly powered racing car). They both cost millions.

Select YES ai rou are shown on the map in the last continue spot. Go to the last stage and when you are there hasse the name and ness.

this top road racer! Complete the King League on EXPERT level and the titles come up. Then a new MASTER difficulty setting appears. It's rock hard and only completely skillful players (like us) will get anywhere on it.

Coo! Last month we stunned the world by exclusively revealing the complete list of fine codes for the Megadrive version of this skill game. Try these out for the Super NES game.

LEVEL ONE: HI KIDS LEVEL TWO: BARTMAN LEVEL THREE: SMITHERS LEVEL FOUR: SNOWBALL

Here's a cunning tip for this "top" racing game. It enables you to stand a far better chance of reaching the coveted number one position! All you have to do is select a two-player game, but DON'T have anyone controlling the second car! This stops the pretty good computer driver taking over, making it slightly easier to come first! Neat, huh?

However, there is a downside to this activity. The absent player's car remains in the centre of the road near the starting line, making it very easy to smash into. However, if you dodge the car after the first lap, the other computer cars plow straight into it!

QUEST

EGADRIV

Well... what have we here? Could it be a great guide to Two Crude Dudes? Could be! These tips enable you to take on most of the meanies in the game! This is just half of Neil Craven's exhaustive (certainly exhausting to read - there are no full stops!) guide More follows next month (if I don't lose his letter!).

PUNKS Easy! Use a flying kick or throw them!

GREASE MONKEYS

Use a throw or flying kick. Remember though, if there's a lots of them, pick one up and chuck him at the rest!

HUNCHBACKS

These guys are dangerous. Use flying kicks on them, or throw them just after they have jumped. Remember that if they get you, you must hit all the buttons in rapid succession to shake them off.

ARMOUR DILLO Use any weapon you have and

stand on the centre platform. Wait for him to slow down then drop down, pick him up and throw him! Repeat the process.

PYROMANIAC

Use flying kicks and move away from this guys after each to avoid being toasted. If he fires at the ground, move up or down to another level and continue the attack when the fires runs out.

DISC CUTTER EEEASSSYYY! Duck down until

he has fired his disc, then roll over to him and throw him before the disc returns

RABID HOUNDS Use flying kicks and if one gets to you, again press all buttons.

COMMANDERS

Use flying kicks and avoid them if they are on a wall. Wait until they

are down again to attack. If you're in two-player mode, it's a good idea to pick up your partner, jump high and throw him!

MAD BOMBER

Watch out for the bombs these guys throw. The easiest way to kill them is to jump over the bombs and then throw them.

HAND SNIPER

Just flying kick him as he approaches, then repeat the move as he stops flickering - indicating he's vulnerable to attack. Jump again if he raises his arm.

Use flying kicks on him when this dude is in his human form. DON'T use the pole until he is in his cyborg form. Stay on the higher platforms and hit with the pole and this guy is history!

CYBORG D2

Use flying kicks until the human transforms into his robot form. Make sure you perfect the technique of rolling when the machine attacks. Don't pick him up, or it's curtains! Roll towards him, punch and roll back. Repeat that process.

Keep the pole until he appears, then just hit him with it! If you've lost the pole, jump over the bombs and use flying kicks on him. Then wait until he's thrown another bomb. Jump over the bombs, kick him and keep repeating this procedure until he's kicked the bucket.

BLACK GILL

Easy!

Use a flying kick. When he slides, jump over him and then throw him!

37 MEAN MACHINES

SEGA

It's one of the best Master System games reviewed of late! Asterix got a great review in MEAN MACHINES and ranks as another topper platform game up there with the likes of Donald Duck and Mickey Mouse! Matthew Burton, a keen Asterix player, has sent in the complete solution! Cor!

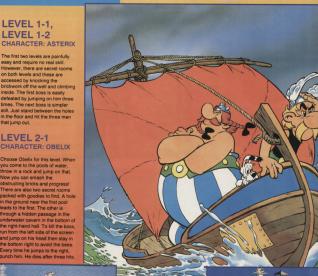

LEVEL 1-1, LEVEL 1-2 CHARACTER: ASTERIX

The first two levels are painfully easy and require no real skill. However, there are secret rooms on both levels and these are accessed by knocking the brickwork off the well and climbing inside. The first boss is easily defeated by jumping on him three times. The next boss is simpler

LEVEL 2-1 CHARACTER: OBELIX

that jump out.

Choose Obelix for this level. When you come to the pools of water. throw in a rock and jump on that. Now you can smash the obstructing bricks and progress! There are also two secret rooms packed with goodies to find. A hole in the ground near the first pool leads to the first. The other is through a hidden passage in the underwater cavern in the bottom of the right-hand hall. To kill the boss. run from the left side of the screen and jump on his head then stay in the bottom right to avoid the bees. Every time he jumps to the right, punch him. He dies after three hits

This level is a real race against time! You need to use an explosion potion to smash the rocks and thus complete the level.

LEVEL 2-3 CHARACTER: ASTERIX

When you get inside the building use the green potion to make platforms on the lava so you can walk across. When you get to the top of the building, you can jump off the left side of the roof if you want to find a secret room, or carry on off the right side to complete the level.

LEVEL 3-1 CHARACTER: ASTERIX

Dodge the snowballs and kill the snowmen and when you have dodged the second lot of snowballs, an extra life appears a few steps away. Jump to it, as there's an invisible hole in the way Then fall down the hole, move left and the wave carries you to the

LEVEL 3-2

Jump onto the ice cubes, dodge the birds and kill the snowmen, but watch out because the ice is slippery. When you go through the exit, you have to find the fire potion which is hidden in a pot to the far right to melt the ice. Continue and you should come to two pots. Hit the first pot to get some bonuses. The key is in the second.

LEVEL 3-3

You are now inside a building. You have to work your way through using the moving platforms until you get to a door. When through the door slide under the small gap to the right and then go through the next door after you've completed a potion to the right. You will soon come to another

small gap. Slide through this for an extra life. The boss jumps from left to right and causes snowballs to fall. Stay to the right side then jump on his head.

LEVEL 4-1

CHARACTER: OBELIX To find the key, enter the secret room via the first blue pot. When extra life by the door in the mud.

you come out, sink in the mud and you enter a room which takes you to the exit. By the way, there is an

LEVEL 4-2 CHARACTER: ASTERIX

On this level there are some huge cannons on the floor. Get inside one and drop an explosive potion to shoot yourself off. The vertical cannon fires you to the key in the cloud, making it simplicity itself to complete the level.

LEVEL 4-3 CHARACTER: ASTERIX

Slide under the gap and into the not. Now if you jump on one of the stones, the other lifts, so jump on the flat one then onto the other and then jump on top of the

scenery to find several secret rooms. When you come to a wall with a moving platform in front, throw potions and they demolish the wall (don't stand on the platform or it collapses). Then dodge the falling rocks and when you reach the top, go left and fight the boss.

LEVEL 5-1 CHARACTER: ASTERIX

Go to the far right and jump up to the door on the roof and collect the explosive potion, then go underground. When you emerge, you are springboarded to the roof. Kill the bird and collect the key and then find the door.

LEVEL 5-2 CHARACTER: OBELIX

Use the bubbles to cross the spikes then go underground. First go left to collect a potion so you can cross the harmful mud, then go right and use the potion to collect the key. Spring back out of the cave and go left to find the exit.

I EVEL 5-3 CHARACTER: ASTERIX

Dodge the falling walls and weights and when you come to the one-way doors, let the weights fall and move them, then dodge the guillotines. In the next room jump from platform to platform taking care to miss the spiders in their

LEVEL 6-1

Swim between the stars until you come to the pink monster, which sucks you inside! Walk through the inside of the monster and then use a potion to open the door. When you come out, swim to the top of the screen and out of the water to collect the key. Keep moving right and at the end throw a potion into the water. Stand on the resulting platform and jump over to the right to find another secret room!

LEVEL 6-2

Climb up the ship using the anchor and then grab hold of the pole the bird is carrying (after you've gone to the left and collected a life). Dodge the obstacles and jump to the right when the bird falls away onto a spring which takes you to a secret room to the right. Find a green potion, then use it to make platforms on the water. Walk across using this bridge to make it

In the first room keep running and jump to get to the top of the screen before the ever-rising lava catches up with you. In the next room, move the pad LEFT when the log top to dodge the spikes. Jump off when you see a pot because this is the key, then jump back on

The whirlwind takes you underground. Kill the fire jugglers with potions but watch out because it's slippery. When you come out, punch the brick to let the water come out. The cactus grows and you can jump left to collect the key. The door is to the

After you jump past the fire-spitting sphinx climb inside the wall and jump past the mummies and go down the last well, collecting the key from the left pot. However,

there is no way out, so commit suicide! Then repeat this level solution, but jump through the hole in the ceiling where you knocked the bricks away to get to the door.

The first room is very hard. You have to jump onto the first platform, do a small jump onto the next and two big jump to reach the side. Jump past the cogs. In the next room you have to follow a platform all the way up to the top, just like in level 3-3. In the next room, jump on the first platform then a next is lowered, so leap atop the next and keep running along. On the other side, pick the middle door, collect the key and

The last level! You're prancing through the streets of Rome on a horse. Jump to avoid the spears on the floor and duck to dodge the spears above. This is all pretty easy, so it shouldn't be long before you're watching the end-game sequence, Hooray!

TIPS

Kid Chameleon is a massive platform game, boasting loads of levels full of danger and excitement. Although for the most part it is quite an easy game, you may have problems with certain levels. These tips, supplied by someone who didn't attach their name to their tips (through. The guide slao helps you locate some of the many secret rooms and warps in the game.

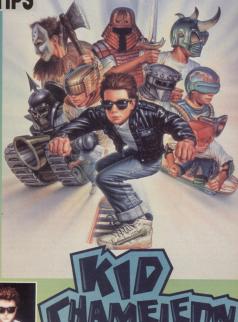

SPECIAL WARPS

SKIP FIRST TWO LEVELS: Finish Blue Lake Woods I in twenty seconds or less, but leave every prize behind, and don't even get hit by anything! Now finish High Water Pass in less than 60 seconds and High Water Pass II in less than 27 seconds. Take the teleporter to skip the rest of the levels.

Here's a little cheat that Nintendo Turtles players could really benefit from. It lets you to start the game with TEN (yes, ten!) turtles and also opens up a level select! Thanks to John Smith from Macclesfield for this tip.

When the title screen pops up, press B, A, B, A, UP, DOWN, B, A, LEFT, RIGHT, and hold down B, A, and START! You'll get your ten turtles and the

COMMENT

Dinosaurs certainly is a strange game. Sure, the graphics are a ttle odd-ball. Ithough they are excellent. The still screen shots look good

enough, but things are even better in motion. What's really strange about the game is its design. On the one hand, the game is packed with innovative and original features with stacks of challenging puzzles and feats of manual dexterity to make life tough on you. On the other hand, there is an extra life dished out on pretty much every level, so it's a long time before you have to use any of the unlimited credits at your disposal, as if Irem want you to complete the game overnight. Dinosaurs is very original, which is rare enough thing at the moment, and it is indeed very playable, except for some atrocious slowdown problems. But the trouble is unless you've got extraordinary willpower (it's way too easy to continue) and can resist the added temptation of the password system, Dinosaurs won't last you more than a weekend. For this reason and its undoubted graphical appeal, Dinosaurs is really one

for the younger players.

These interlocking walls scroll back and forth crushing any dino trapped between the halves. A The groovy rollercoaster of death

How crap do Irem think us players are? Not only does Dinosaurs feature unlimited continues, but extra lives are given virtually every level AND there's a password system too! The upshot of this is that it's virtually impossible not to crack the entire game within a few hours. Doh! It's a shame, really, because Dinosaurs is packed full

JULIAN

out of it

of neat ideas and features some great screens. Okay, so the game slows down occasionally, but it doesn't mar the fun and enjoyment. What does do that is the lack of challenge. It's all over before you know it. Without all the player help and with a little more challenge, Dinosaurs could have been brill. As it is, only beginners and children will get anything

Fairground trivolity abounds

Isn't it funny how the oldest game in the Gameboy chart also happens to be the cart at the number one slot? Yes indeed - Super Marioland still rules the roost. Choplifter II makes a welcome charge for the top slot, with Adventure Island and Hook raliving for that same position.

SAGAIA ORIGINS

This packs all the features of the original arcade game, but suffers terribly from flickery sprites and slowdown when things get busy. There's certainly plenty of action and the game is challenging too, but to be honest the very poor graphics and severe flicker put me off after a few sessions. It gets really annoying, especially when you get hit by a bullet or baddie

that's been all but invisible due to mega flicker! If you're after a blaster, check out R-Type or Powerstrike before even thinking about buying this - they both offer more challenge and better visuals.

COMMENT

LOOK AT MY ARSENAL

There are a fair few weapons to bolt on to your ship in Sagaia for extra destruction-causing ability. The game gives you bombs and lasers from the beginning, but collection of power-up pods lets you boost their effectiveness. For example, power-up your bombing bays and you're allowed to fire off not one, but two at once. The ship's lasers can be boosted too, allowing for deadlier power and even vertically blasting attachments! For the defence conscious pilot, shields are also available that absorb around five hits before being vapourised.

COMMENT

to this game was "Urggghhh!". The graphics in this game are atrocious, with small, boring sprites, average backgrounds and some of the worst flicker yet

My first reaction

seen on a console game. The sound, as you might expect, is of a similar low quality. Luckily, the game itself plays fairly well. The action is plenty fast and there are loads of things to shoot (if you can see them through the unforgivable flicker). As an arcade conversion, Sagaia scores pretty highly too. Just about all of the features from the arcade original have made it into the game, including the many bosses and all the power-up weapons. The game is pretty tough too, making it quite a challenge to get through. The flickering graphics really do take a lot of the enjoyment out of the game, though. Sometimes an enemy collides with you, and

since you can't see many of the sprites very well, it seems very unfair. Shoot 'em up fanatics

might enjoy this, but R-Type is

still miles better than this effort.

There's a choice of ship, difficulty level and auto-fire option.

GRAPHICS

Small, weedy sprites, lacklustre graphics and eye-strain inducing flicker.

The blast frenzy isn't really successfully captured with these lacking sound effects.

If you can get over the flicker, Sagaia does have some fairly good blasting antics on offer.

Loads of worlds to conquer, most of them pretty hard to crack.

A fairly good blaster ruined by awful graphics and some shoddy programming.

American of sports in a new sports simulation for the Megadrive. Every effort has been made to include all the rules of the official game like fouls, substitutions

heart-breaking decisions when someone needs dropping from the team. But then, it's tough at the top so ... let's play ball.

For those inept enough not to know the basic rules of basketball, it's all very simple. The game consists of two parts - offence and defence. Each team alternates between these two roles. The team which has possession of the ball is the offence, and its object is to score a basket at the other team's end (worth two points). The defence's job is to prevent this and gain possession. The game is split into four periods, and each team has the option to call additional "time-outs" if it has possession. There are other rules governing play, if you break them your heading for one of the following violations:

Single games are only a preparation for the ultimate challenge of the NBA tournament. If you enter this you face some awesome competition from the best team players in basketball. The eighteen teams taking part compete in two leagues, the Western and Eastern conferences, and each league fields one team for the final. You can follow your progress on a massive scrolling tournament-board. The tournament stages are each played over the best of 7 games, with each team playing home and away. The computer records all the performance stats for each of your players as you progress. Thankfully a password facility has been included for you to start from where you left off.

you're stupid enough to be into drugs then you

might be interested in Nuke, the new designer narcotic to hit the streets of Old Detroit. But on the other hand, there are a few things that might just put you off.

First, it's instantly addictive, second it's quite lethal, third Robocop has a nasty habit of shooting people found in possession of Nuke and fourth it gives you spots. None of this has stopped Cain the loony from building up a huge market for the stuff in Old Detroit, a market which you, as Robocop, must destroy. As everyone knows the best way to do this is to raid all the safehouses and factories which supply and produce Nuke and shoot everyone except the people in charge, whom it's handy to arrest. Oh, and seize all of the drugs too. This is Robo's new mission in life. one which you must help him carry out.

Robocop 2 is another horizontally scrolling platform blaster from Ocean. It's more or less a conversion of their home computer titles starring you as the running. jumping and shooting cyborg on a mission of doom. There are several levels to conquer before the final showdown with Cain, who is now transformed into the deadly Robocop 2.

During each mission, Robo arrests a certain proportion of major criminals and seizes a set amount of drugs before he progresses to the next level. These limits are quite tough, and often a secret room must be found in order to complete the level. For instance. in level one there is a secret underground sewerage way in which most of the Nuke is stored. If Robo doesn't go down here he doesn't confiscate enough drugs to pass through to level two.

As well as armour to improve on there are plenty of weapons for Galahad to get his mitts on. Like the armour the strength of these weapons vary. Galahad starts with a short training sword capable of inflicting one hit point to enemies. This does okay for the first few levels, but as enemies get tougher, Galahad's weapons need to do the same. The dagger and long sword give one and two damage points respectively. The Tempest blade inflicts two hit points and increases Galahad's speed and jumping abilities. The lion blade is the strongest sword damaging your enemies to the tune of five points. Besides swords there are rune bombs and a suicide weapon which delivers 20 hit points to any enemy on screen in exchange for one of Galahad's lives. Like the armour, the best weapons are the most expensive.

SAFE FROM HARM

Any kinght could tell you that it is pretty damn important to wear armour before usubing off into battle. The initial strength of Galahadr's armour depends on the game's difficulty setting. In normal mode he stats with blue armour, allowing him to sustain three hit points. Purple is the weakest armour witho's capable of taking one hit only. Then comes green with two damage points. Silver armour enables Galahad to sustain four hits and gold armour five. The strongest armour is black, and Galahad can handle six attacks wearing this. Quite naturally, the better the armour, the higher the cost.

The cockpit layouts of both choppers are completely different. The Apache has most of the conventional instrumentation you'd expect, but the LHX has the latest computer-driven flight system. Both choppers use the same navigation computer that provides full information on target distance and bearing, and a one mile radar scan system. The navigation computer (navcom) is linked to the target computer which locks your missiles and cannon onto an enemy. It gives you status of the target and provides a close-up

Once I'd worked

Interceptor. RICH Whereas the latter concentrated on fast. dogfighting action, LHX is a lot more of a tactical game. Each mission requires a good deal of thought and examination of maps in order to progress. Just flying straight in leads to a lead-related death! That's not to say that LHX is devoid of action. Some of the missions are very intense, calling on all your chopper-related abilities in order to escape it one piece. Graphically the game isn't very

detailed, but the 3D update is respectable and depicts the action very well. The sound is similarly functional with decent blasting noises and a good chopper effect (the speech sounds a bit suspect though). Electronic Arts hold all the aces when it comes to flight sime F-22 is perfect for action fans. LHX Attack Chopper comes into its own in terms of realism and depth. Personally, I prefer the latter - a great game for serious

Megadrive players.

Plenty of options to wade through and some pleasant static presentation screens.

The shaded vector graphics move reasonably fast and the cockpit layout is smart.

The effects and speech are atmospheric but sparse.

The complex control system may prove infuriating for beginners but the compulsion to get into the game is high.

Persevere and you'll discover a game with plenty of depth and excitement.

A REAL air-combat simulation, LHX

Attack Chopper is highly recommended to anyone after a good, lastable game.

COMMENT

I must admit it took me a bit of time to get into LHX Attack Chopper. At first it looked like F-22 with the hest bits cut out, but with a little perseverance I had to change my mind. The control system is a little tricky, with all the functions so close together and it was inevitable that some of the features of the PC version would be left out. What remains, though, is a damn fine

combat game, made all the better for the varied and well thought out missions it offers. My favourite involves rescuing POWs from a remote camp with the ack-ack fire coming from all sides. The challenge of all five skill levels is massive. The idea of altering the viewpoint, which was a bit of a gimmick in F-22 is enhanced considerably here. With a bit of practice you'll soon be seeing yourself strafing a gun emplacement from above and watching it explode from close-range, it loses out to F-22 in some ways, for example the dogfights aren't as ace, but it more than makes up for it in the strategy department. The bottom line is that this is a game

which is bound to reward from a little patience and

attention. Take a look and see.

COMMENT

To be frank. Hook is not an original product Platform games for the SNES are backlogging at a frightening rate, and, although fun for a while, this hasn't got any features

which lift it out o the crowd. To cap it all, it's not really a man's game at all progress is too rapid. You could find yourself twiddling your thumbs after completing it in not too many days. The bosses would especially be much more entertaining if they were a bit more robust. Most of all, it seems to be severely lacking in the gameplay department. It's a shame to have to say all this, because Hook looks and sounds very nice in places and plays pleasantly. But if it's thrills you're after, leave this as the choice of a younger generation

IT'S WEAPONS HOUR!

As well as his trusty Dragonsword, there are five different weapons for Ryu to choose. Ryu only has the ability to carry one weapon at a time, but experience dictates what weapon should be used where. The more powerful the weapon is the more combat points it uses up.

Decent platform games have been a bit scarce on the Master System recently. Apart from Prince of Persia, there has been little else. Fortunately, Ninja Gaiden more than makes up for the relapse. It bosts excellent graphics, full of colour, with a detailed attention to backdrops. I was also impressed by the animation which, like Prince of Persia, manages to fulfill its potential. arwin's theory of evolution expresses the belief that pre-historic man was a bi-ped capable of using his hands to carve intricate hunting tools Unfortunately of Charlie was completely wrong, as is made plainly obvious by the existence of Fred Flintstone. While Fred doesn't have a neck, he does have a job, a car, a wife, a bowling partner and a house in the suburbs of Bedrock

But the pleasant mayhem of the Flintstones' existence is ruined when a certain Dr Butler appears in a time machine. After explaining he is a 30th Century zoo keeper, he whips away Dino and Hoppy, the beloved family pets. Gazoo, Fred's alien buddy, is just about to rev up his time machine in pursuit when Dr Butler destroys it, scattering the parts all over Bedrock county.

Sad isn't it? Well before you start blubbing over your NES, there is hope. Fred has been assigned the job of hunting for the scattered parts of the time machine. With the aid of his trusty club and the Flintstones clan. Fred has to make his way through jungles, past gangsters, and across waterways to hunt down the valuable shrappel. He even has to challenge villains to basketball matches on his quest! But when Dino and Hoppy are safely back in suburban Bedrock, the family that laughed in the face of Dr Darwin, can laugh even louder in the face of Dr Butler. YABBADABBADOO!

HANG ON IN THERE

As you might expect of a prehistoric man, Fred is fighting fit Not only can he leap and run, he can also hang. If Fred wants to reach a platform above him he is able to crawl up using his chunky arms. The same principle follows when the athletic apeman can't make a jump. Rather than fall to his death, by grabbing the edge of the platform Fred scrambles to safety!

Gazoo reconstructs the time

COMMENT

I can't really say that The Flintstones is one of my favourite his NES interpretation of Fred's various antics isn't bad at all. The

RICH

are all as faithful as you'll get. Gameplay-wise, the Flintstone is pretty standard fare. It's yet couldn't really find anything new or outstanding in it that real makes the game feel fresh or exciting. Having said that, The example of the genre and will you're after, you're better off getting Super Mario III, Shadow Warrior, Kabuki or Rescue Rangers. All offer far more in the

Fred forgets to feed the family pet.

TOOLS OF HE TRADE

Although Fred's leopard skin all-in-one doesn't frighten off enemies, some of his fighting tools do. The trusty club stays with Fred at all times. It is particularly good at bashing enemies coming head on for a straight fight. Some are more cunning however, and shoot at Fred with their pop guns. For foes such as these, Fred needs to get his hands on the catapult. With his impeccable aiming abilities. Fred can take baddies out from a distance. For those that assault from above Fred needs the axe, this travels in an arc and is also good at killing enemies at a distance

The finistones is also quite an easy game, and no real challenge to platform flends. Despite my gripps, although I quite enjoyed playing The Flinistones: Im afraid you won't get a "Yabbadabbadoi" out of me!

BARREL OF FUN

During his journeys Fred comes across many barrels. Should he set about one with his club it opens up revealing a useful item. Standard prehistoric grub like burgers and popcorn helps to raise his life gauge. A heart brings Fred back to full life, and the axe and catapult prove handy in disposing of enemies.

GREEN AND FRIENDLY

Despite having his spaceship destroyed by the eul/O Buller, Gazoo is still ready to lend Fred a hand at various stages in the game. When Fred wants to get to some barriels but can't jump high enough, he has the chance to call on the firendly tills aller by up and pressing staff. Gazoo points. There are other estimations in which he manages to save the racking of brains so don't forget he's there!

ADVICE CORNER

When Fred has almost managed to complete a stage, one of his friends suddenly appears. They give Fred some useful advice about a boss he is approaching. They may even pass on a weapon that helps him to beat the boss. Flinistones fans will notice that for some strange reason Barney has dwed his hair brown!

It's a tragic tale but true. That lovable dolphin, Filipper, star of the much admired sixties TV sense, has gone barking mad. Buring filming in the Pacific for a Christmas spécial edition of the show, he begins to suffer horsefulous Vielnam Bashback. These traumatic fiallucinations drive him to a decision. he must go back in Twisted Filipper, the player guides the synamic dolphin on a return mission deep into eventy territory. Only by saving the PAW's still held in a Saligno prison, shall Filipper be cured of the disease testing his mind. Inhat could all be complete rusboth fabricated to carry out a dehap pun on the

The flippers in this game have nothing to do with sea-during maintain. Instead players fire up a silver ball and use a mixture of skill and insulon to amass as many points do possible. It was profess labels as many points do possible. It was profess labels into the cramed confines of the Megadrive. There are three sets of lingers to work with, but falling through the lowest set loses the ball. Mutant skulls and the profession of the confine proceedings more hezardous, and deventing tasks present new ways to get at the point. All good probal games have a two-player option, but Twistler Flipper actually takes to contain a profession of the point and the profession of the point and the profession of the profession of the profession of the point. ▲ The word "head"

For those of you contemplating buying a pinball sim, the thing you probably want to know is whether or not this is better than Dragon's Fury. In the playability department things are pretty even. The inertia of the ball is very realistic, and

here are no quirks in the game logic that cause the ball to rebound at strange angles. The sound too, matches the classic rock opera of Dragon's Fury with wild guitar solo's a-plenty. But I'm afraid it's at this point that Dragon's Fury leaves its rival behind. Basically Twisted Flipper lacks the variety necessary to make a pinball sim interesting - there just isn't enough going on. While a few sprites move about the screen, most of the graphics are static and short on detail. Bonus screens, which work wonders in Dragon's Fury are few and far between in this game. While the Jump Ramp bonus level is an impressive idea it is generally the only extra level that turns up regularly. The four-player mode opens up the door for some multi-player fun, but the actual pinball action is just too dull to keep anyone interested for long. So in answer to the opening question, I'd say that although Twisted Flipper has some okay pinball action, it's beaten hands down by Dragon's Fury.

R.

Being a keen pinball fan, I really wanted to enjoy this game. But try wanted to enjoy this game. But try as a limjdht, the more I played, the more I got bored. The problem is that the challenge level is too low the collision detection on the flippers is too forgiving and it sall too easy to keep the ball in play. Consequently id doesn't take long to get to a level where games go on for ages at a time, and me at time, and to all the latter games go

is compounded by the fact that there's not enough happening on the table to keep your interest going between bonus screens - the amount of drop targets and trick shots is actually very limited. The graphics and sound are very slick, and the ball movement is fairly realistic catthough I found its with the control of properties of the control of properties of the control of challenging.

Ittle else besides. Sad title screen as well.

CRADUICS 720

Some nicely drawn and animated sprites, but not enough of them.

DUND 85%

Some air punching, soft rock riffs and decent bing-bong pinball sound effects.

LAYABILITY 86%

The pinball "feel" is successfully reproduced, which means its easy to get into.

LASTABILITY 70%

The absence of enough bonus screens means monotony soon starts to set in.

OVERALL 74%

A realistic pinball sim that doesn't offer enough challenge or variety. Dragon's Fury is a better alternative.

WEAPON HEAVEN

That's what everyone loves about a shoot em in; GUNSI LOADS OF THE BLIGHTERS! Fortunately. The shoot have maintained this tradition, and Thunderforce IV has plenty of power ups for you to collect. Some are pretty much the same as those in Thunderforce III, but most are modified versions. And here they are:

A psychotic K9 comes under

attack.

FREE WAY

When things ahead start getting congested it's time to use the Free Way! Missiles fire diagonally up and down, and straight ahead, and in both horizontal directions to clear a route for the ship. Collectively the missiles make a formidable weapon.

CLAW

One of the most useful items to pick up, the claw revolves around the ship and multiplies the amoun of firing ports, allowing the ship to enter further realms of alien dusting!

HUNTE

An old favourite, and very handy to boot! The hunter weapons are heat-seekers that are drawn to on-screen enemies. They're not the most powerful of weapons but are excellent when the ship is taking attacks from all sides.

This weapon does as it says and snakes along the roof and base of the screen destroying static canons and bombs, which otherwise tend to cause extreme havoc and confusion.

ATOMIC RUNNER

Coming soon, to charge around Megadrives everywhere will be Atomic Runner, alias Chelnov. from Data Fast

You play Chelnov, the son of an incredible scientist, who finds himself launched into the realms of a nightmare, battling against an alien invasion. Unfortunately your father is killed in the melee, but before he croaks he describes to you the awful truth that is your only hope. Apparently this marauding force had been to Earth thousands of years ago and could be traced back to before even the dawn of

mankind However, being an all-round hero, you're able to combat the alien menace across many levels of scrolling blast 'em up chaos. From what we've seen already Atomic Runner has some of the best graphics vet seen on the Megadrive with pulse-racingly superb music to match. Look out for Atomic Runner in your favourite games emporium and check out MEAN MACHINES for the full review!

Just when you thought the last punch had been thrown on the Super NES, Culture Brain release Golden Fighter. It's a twelve megabit cart containing plenty of fist frivolity. There's the chance to enter one-on-one competitions. where players can either fight each other or the computer, or alternatively play in a Double Dragon style beat em' up with all of the diversions it entails. In the one-on-one mode there are a whole series of moves to master. and a challenging tournament to enter. Players choose from a variety of combat forms like karate. boxing, Thai boxing, wrestling and

street fighting. Each opponent has a standard set of moves as well as some specialist individual ones. Golden Fighter looks pretty good. but things are a tad shaky in the playability department. Read the full review in an up-coming edition of the all-new NINTENDO MAGAZINE SYSTEM.

Super NES Dragon's Lair, Dirk's third Nintendo outing, once more pits Dirk against his scaled adversary in a sprawling platform quest. As usual special attention has been paid to the graphics, and as a result the sprites are big and well animated, the backgrounds are stuffed with parallax and detail and there's codles of colour all round. The sound is great too, with the tunes being of the soothing variety and top quality. However, how will it fare when it gets down to Dragon's Lair doesn't really have much of a reputation

Trekkies rejoice! Your favourite sci-fi television series is about to warp it's way to a NES near you. Ultra Games have managed to include all the style and intrigue of the hit series in a game based around the adventures of the crew aboard the Starship Enterprise. Star Trek is an action/adventure game which requires the player, as Kirk, to command the Enterprise through four different missions, all of which form part of the main goal which is to repair a hole in space. Funnily enough, this was caused when our hapless hero, Kirk, accidentally created during an experiment in warp travel. If all this seems too simple, bear in mind that the Enterprise was damaged by the ensuing blast when the hole was created and has blown the ship into the depths of uncharted space.

Sounds cool eh? Well, rest assured. We'll be

achieving any sort of praise out of all the other versions, coin-op included! Rest assured the full lowdown will be revealed in an issue of NINTENDO MAGAZINE SYSTEM coming soon!

Got something to sell? Or want to swap games? Do you want something, or do you have a special message? Perhaps you just want a pen pal? Well, whatever you want, the MEAN MACHINES Meaamart is the place for you.

For just £1.00 you can have your very own advertisement containing up to 20 words! Or if you're feeling rich and verbose (look it up in the dictionary),

£2.00 will buy you 40 (count 'em) words!! So what are you waiting for? Fill in the squares below with your words, pop it in an envelope along with a cheque or postal order made payable to MEAN MACHINES and send it to:

MEAN MACHINES MEGAMART.

MEAN MACHINES, PRIORY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

ATTENTION!

MEAN MACHINES Megamart is for private advertisers only. Anybody sending in a trade advert will not have it published. It will be ignored, your cheque will not be cashed and no correspondence will be entered into! — However if you are interested in placing a lineage trade ad please contact Martha on 071-251 6222 NOW!

Due to deadlines, allow up to six weeks for your advert to appear in the magazine.
